PROFESSIONAL SUMMARY

AI Developer with 5+ years of experience, specializing in Generative AI solutions for the past 2 years. Proficient in building LLM-powered applications using OpenAI, Gemini, Claude, and Groq, with expertise in RAG implementations, LangChain, and LangGraph. Strong Python development background with automation experience in RPA (Power Automate), PowerShell (3.5 years), and Bash (2 years). Focused on creating innovative, AI-enabled solutions that bridge traditional automation with cutting-edge GenAI capabilities.

TECHNICAL SKILLS

- Languages: Python, PowerShell & Bash (Scripting)
- Frameworks: Pandas, Numpy
- Tools: Power BI, Power Automate (RPA)
- Platforms: Jupyter Notebook, Visual Studio Code, Cursor
- Domains: Storage Automation
- LLMs & AI Frameworks:
 - Retrieval-Augmented Generation (RAG), LangChain (chains, agents, tools, memory), OpenAI Agent SDK (agent workflows, tool calling, orchestration)
- LLMs & AI Tools: Experience working with OpenAI GPT (ChatGPT and API integrations), Google Gemini, and Groq for automation, code generation, and data processing.
- AI-Assisted Development: Proficient in leveraging AI-assisted development environments such as GitHub Copilot, Amazon Q, Cursor, and Augment to enhance productivity, improve code quality, and accelerate debugging and refactoring workflows.

PROFESSIONAL EXPERIENCE

DXC Technology

Analyst I Infrastructure Services – Nov2023 - Present

- Designed and developed Virtual Linux System Assistant AI Agent, Change Management AI Agent. Built intelligent change management system with Python microservices using Langchain agents and Azure OpenAI. Automated risk analysis by analyzing 7,000+ historical failures, implemented async ServiceNow API integration. Tech: Python, Fast API, Langchain, Azure OpenAI, Streamlit.
- Designed and developed HealthMate AI, a RAG-based Generative AI application that delivers personalized health reports and wellness plans, showcasing innovation in AI-driven healthcare automations.
- Led end-to-end automation development lifecycle – from requirement gathering and solution design to development, testing, and deployment – with hands-on experience in automating enterprise storage systems including Cisco, HPE 3PAR, Brocade, and Nimble.
- Applied machine learning and generative AI to build smart automation solutions that solve real-world business problems.
- Developed reusable automation components to help scale solutions across multiple client projects and reduce development time.

Professional 1 Service Delivery Coordinator | October 2022 –November 2023

- Delivered 50+ automation solutions end-to-end, covering requirement analysis, development, and deployment using PowerShell, Bash, and RPA tools.
- Identified and proposed automation opportunities across multiple accounts through close collaboration and discussions with Account Delivery Leads (ADLs).

Associate professional software engineer | January 2021 –October 2022

- Delivered 30+ automation solutions end-to-end, covering requirement analysis, development, and deployment using PowerShell, Bash, and RPA tools.
- Part of Storage automation use case identification and development.

EDUCATION

Bachelor of Technology (B.Tech), Electrical Engineering
Asansol Engineering College | 2016 – 2020

Class XII – CBSE | 2015

Class X – CBSE | 2013

CERTIFICATIONS

- Microsoft Certified Azure Fundamentals (AZ-900)
- Microsoft Certified: Azure AI Engineer Associate (AI-102)
- Oracle Cloud Infrastructure 2023 AI Certified Foundation Associate
- Python Basics Course – Udemy
- Automation with Python – Udemy
- LangChain in Action: Develop LLM-Powered Applications – Udemy
- QuickStart: LangChain Essentials – Python by Langchain
